LanguageLine Solutions®

LanguageLine® Translation and Localization℠

LanguageLine TranslateExpress℠ for Epic

After-Visit Summary and Discharge Instruction Translations

Help patients understand what comes next. With LanguageLine TranslateExpress integrated into Epic, your care teams can request translations of after-visit summaries (AVS) and discharge instructions with one click. Each document is translated using machine translation and reviewed by a professional linguist, with completed translations returned directly to Epic and MyChart in as little as 15 minutes.

ONE CLICK TO REQUEST / RETURNED TRANSLATION WITHIN 15 MINUTES

Integrated translation workflow

Request

A member of the care team selects an eligible AVS or discharge instruction in Epic and sends the translation request to LanguageLine with one click.

Translate

TranslateExpress combines machine translation with professional human post-editing for a fast, human-validated translation.

Receive

The completed translation is returned to the patient's record in Epic and MyChart in as little as 15 minutes.

Make care transitions easier

- **Reduce manual steps.** Send and receive translation requests directly within the Epic workflow.
- **Keep instructions accessible.** Return translated after-visit summaries and discharge instructions to the patient portal.
- **Move quickly.** Support timely access to next steps following an appointment or hospital discharge.

Security throughout the workflow

Protect patient documents as they move between systems with encryption in transit and at rest, secure system-to-system transfers and controlled access.

How TranslateExpress works

TranslateExpress combines machine translation with professional linguist review to translate short, time-sensitive documents through a secure workflow designed to support language access requirements.
