

LanguageLine TranslateExpressSM for Epic

AVS and Discharge Instruction Translations

Help patients understand what comes next. With an Epic integration to LanguageLine TranslateExpress, you can send after-visit summaries (AVS) and discharge instructions from Epic to LanguageLine with one click, have them translated, and return them to MyChart within just two hours.

ONE CLICK TO REQUEST / RETURNED TRANSLATION WITHIN 2 HOURS

Integrated translation workflow

Make care transitions easier

- **Reduce manual steps.** Send and receive translation requests inside the Epic workflow.
- **Keep instructions in reach.** Return translated AVS and discharge instructions in the patient portal.
- **Move quickly.** Support timely access to next steps after a visit or discharge.

Security throughout the workflow

Protect patient documents as they move between systems with encryption in transit and at rest, secure system-to-system transfer, and controlled access.

How TranslateExpress works

TranslateExpress combines machine translation with professional linguist review to translate short documents through a workflow designed to support Section 1557 language access requirements.

English-to-language translation coverage for eligible after-visit summaries and discharge documents

66 languages supported

● U.S.-based linguistic resources available 5 AM-7 PM PT
